Cancer Prevention: Role of Government and Other Health Bodies

Adarsh Kesharwani*

Anuradha Kesharwani**

Mohd Asad Farooqi***

Introduction

Today's health scene is vastly different, with major gains in all key metrics of health progress. However, there is still more work to be done in our country to address poverty and bad health.

Our health concerns which include serious infections, malnutrition, gastrointestinal infections, and respiratory diseases, are not the same as those in more developed countries. However, infectious diseases worsened by poor living conditions or hunger,
